MFC-885CW

The MFC-885CW is the only communication tool you need for doing business whether it's at home or in the office.

The MFC-885CW is the ultimate professional office printing device. Offering fast, quality colour printing it can respond to your most difficult print projects with ease. It also provides flatbed scanning, copying and faxing facilities in mono and full colour to the standard of any standalone machine. You benefit from having to find the space and costs for just one machine.

The MFC-885CW is also a telecoms hub complete with a stylish DECT handset and integrated answering machine, ensuring you keep in touch and never miss that important call. The MFC-885CW is accessible over a wired or wireless network and will give you complete flexibility to work in any room, as well as being able to share its features with other team or family members.

Despite its powerful features the MFC-885CW still remains simple to use. It has a generous 4.2" full colour wide LCD screen so changing functions and viewing photos is easy. You can also plug in your digital camera, memory card or USB stick to view your images. What's more, with its PhotoCapture Centre™ you can enhance your photographs, without a PC, for example removing red eye or adapting skin tone or scenery colours so you get the perfect picture before printing.

The results are stunning and you'll be amazed at the life-like quality and the whole family will want to use it! And with Brother's cost effective four ink technology you can afford to let them.

We like saving you time and money. That's why we put our ink cartridges at the front of the printer so you can change them quickly and easily, and because we use separate cartridges you only have to replace the colour that runs out.

Our Automatic Document Feeder makes light work of copying, faxing or scanning multi-page documents and there's even a plain paper and photo paper tray giving you optimum results with the minimum of fuss.

To achieve high quality printing we recommend using Brother's Innobella™ ink and paper technology.
